

Alice's Adventures in Wonderland

This book is about a girl, Alice, who wanders into Wonderland and goes on an adventure. There she gets caught up in all sorts of things. She meets a talking cat and is chased by a special soldier. At this rate, she will be killed. Will Alice be able to return to her original world?

There are two main things I like. The first is about Alice's delusions and what she feels. It is very interesting to see the girl's curiosity and how her mood changes. The second is the scene where the characters are having a conversation. Alice is humorous because she shows various reactions to their remarks and actions.
